What makes us different?

Clear ROI, seamless integration, and best-in-class automation: a system that pays for itself in less than 3 months.

| What makes RapidClaims Unique?	RapidClaims	The Rest
Customizations	Fully configurable workflows, minimal dev required	Limited or require engineering effort
Time to go-live	6-8 weeks	2-6 months
Minimum Charts Required for Go-Live	500-1000 Charts Per Site	20,000 - 50,000 Charts
Integration time	API & FHIR-based plug-ins, < 1 month; RPA	Long IT onboarding
Speciality coverage	Built for multi-specialty including complex care	Often limited to primary specialties
Documentation improvement	Smart query module suggests clarifications in real time	Manual follow-up by coders
Code Audits	Built-in pre-submit audits with real-time flags	Post-submission audits
Team collaboration	Shared queues, in-app notes & escalation paths	Disjointed workflows
Analytics	Real-time dashboards, ROI tracking, denial trends	Limited to basic reporting
Care gap detection	AI flags missed opportunities during coding	Not typically supported

RapidClaims
